

Systems Development Consulting

Providing individual or managed teams of on-site consultants with the expertise you need for your project or staff supplementation needs in high technology systems development.

Business Analysis / Needs Assessment. Obtaining business objectives is the ultimate priority in corporate success. When technical implementations are required within the framework of a business objective, effective communication and understanding between the business and technical elements of an organization become a major factor affecting success. TCS experts have over 20 years background in managing the liaison between business and technical departments. They will ensure for that business goals are market achievable within your corporate technology infrastructure and enable the deep level of understanding between your business and technical departments to bring about a cohesive team for success.

- Requirements Solicitation
- Liaison between Business and Technical
- Translation of Business Requirements to Technical Specification
- Validation of Technical Specification's Ability to Meet Business Need
- Requirements Management

Project Management. Experienced project management consultants bring project management to organizations. These consultants work directly with individuals or teams, to implement customized solutions that focus on business objectives. For over 20 years our PM leaders have been applying and cultivating the most current project management concepts, techniques for state of the art technologies. This enables TCS to provide efficient and mature project management methodologies using collaborative process that will propel your teams to individual and project success.

Software Development. Our goal it is to work with you as a member of your team with a commitment to provide the "right fit" expert with the deep technical expertise the core technologies you require. If you currently have a gap in required technology expertise or in the number of resources to get the job done quickly, TCS can provide you with the software development technologists you need. Give us your requirements, and within 2 business days we will provide you a selection of consultants that match your technical and industry specific needs.
